4. (Internal Use Only - PLC) Called Bill Skidmore, OMB, to determine the deadline for the submission of the Agency's report on S. 1726 [Senator Mike Gravel (D., Alaska)] and S. 2451, which establish a statutory program for classification, declassification, and dissemination of information to the Congress and the public. Skidmore requested that we submit our report not later than next week if possible since the Senate Government Operations Committee is scheduled to complete hearings by the last week in May. 25X1C

6. (Unclassified - GLC) Jim Oliver, Office of Management and Budget, called with regard to our comment on DOD's proposed personnel legislation. The thrust of Oliver's remarks were that in view of the Director's responsibility for the intelligence community as recently reflected in the President's letter of 5 November, he felt we should take a stronger position on the DOD legislation. He added that the Civil Service Commission has strongly opposed this legislation and added if we give further support to the proposal, OMB representatives would like to come out and talk further with us as to the reasons why we thought this legislation was desirable. I told Oliver I would talk with the Director about this and be back in touch on Monday. 25X1A

25X1A 7. (Unclassified - GLC) Sam Goldberg,   
 Administrative Assistant to Senator Mathias, called to say he is leaving the Federal Energy Office where he has been working for the past few months to take a position on Governor Holton's staff in State Department. He said he hoped to be handling legislative matters in the Senate and looked forward to a close association with us on matters of common interest. We agreed that once Goldberg is settled in his new position we would get together for lunch.
